

BONNELL SPRING MACHINE

Lay Out

Product Characteristic

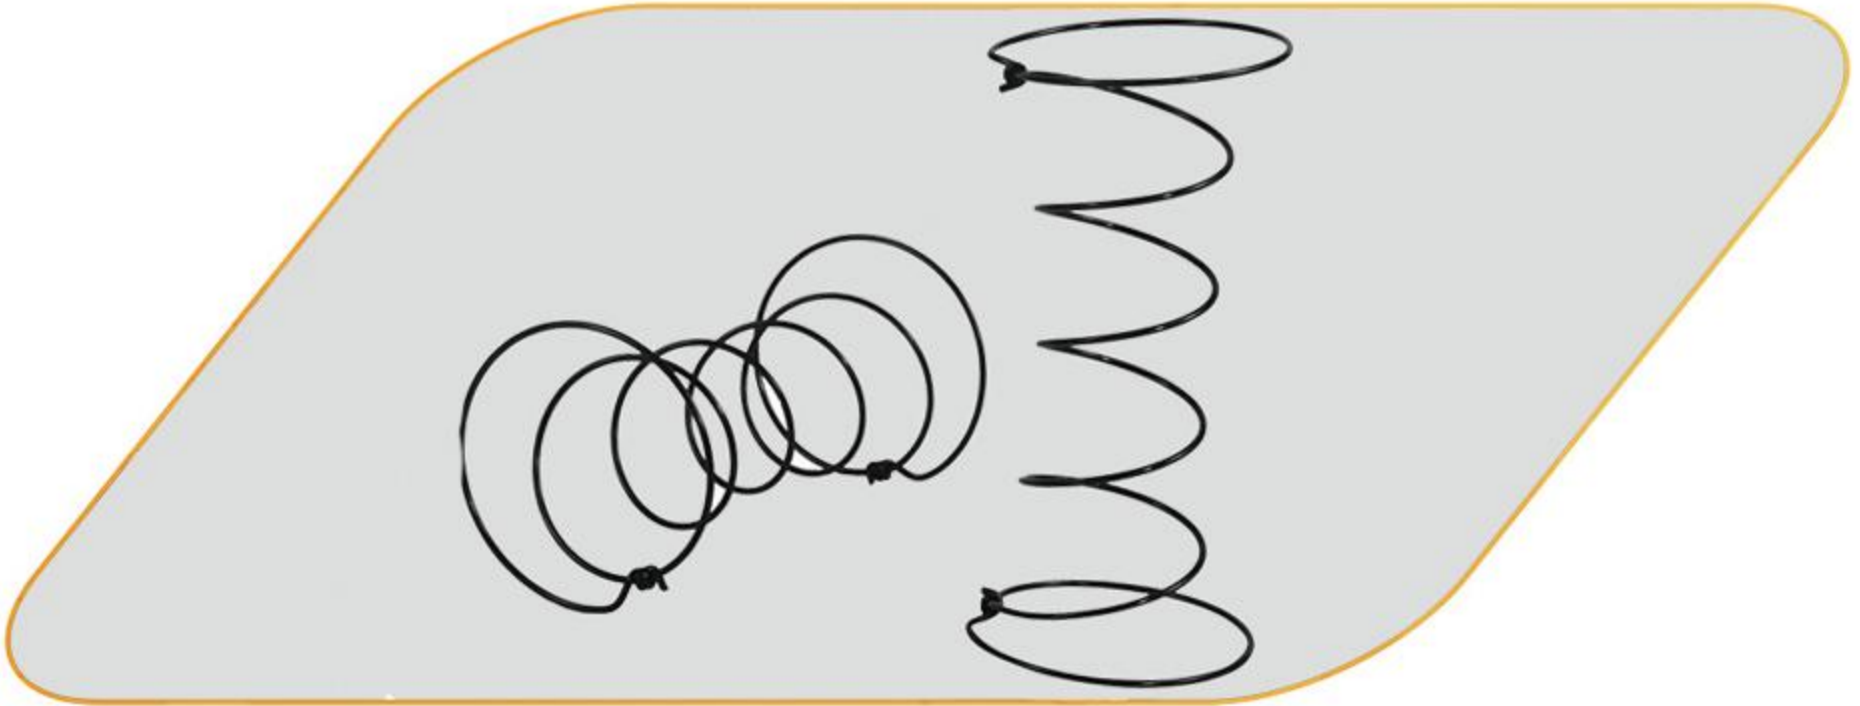

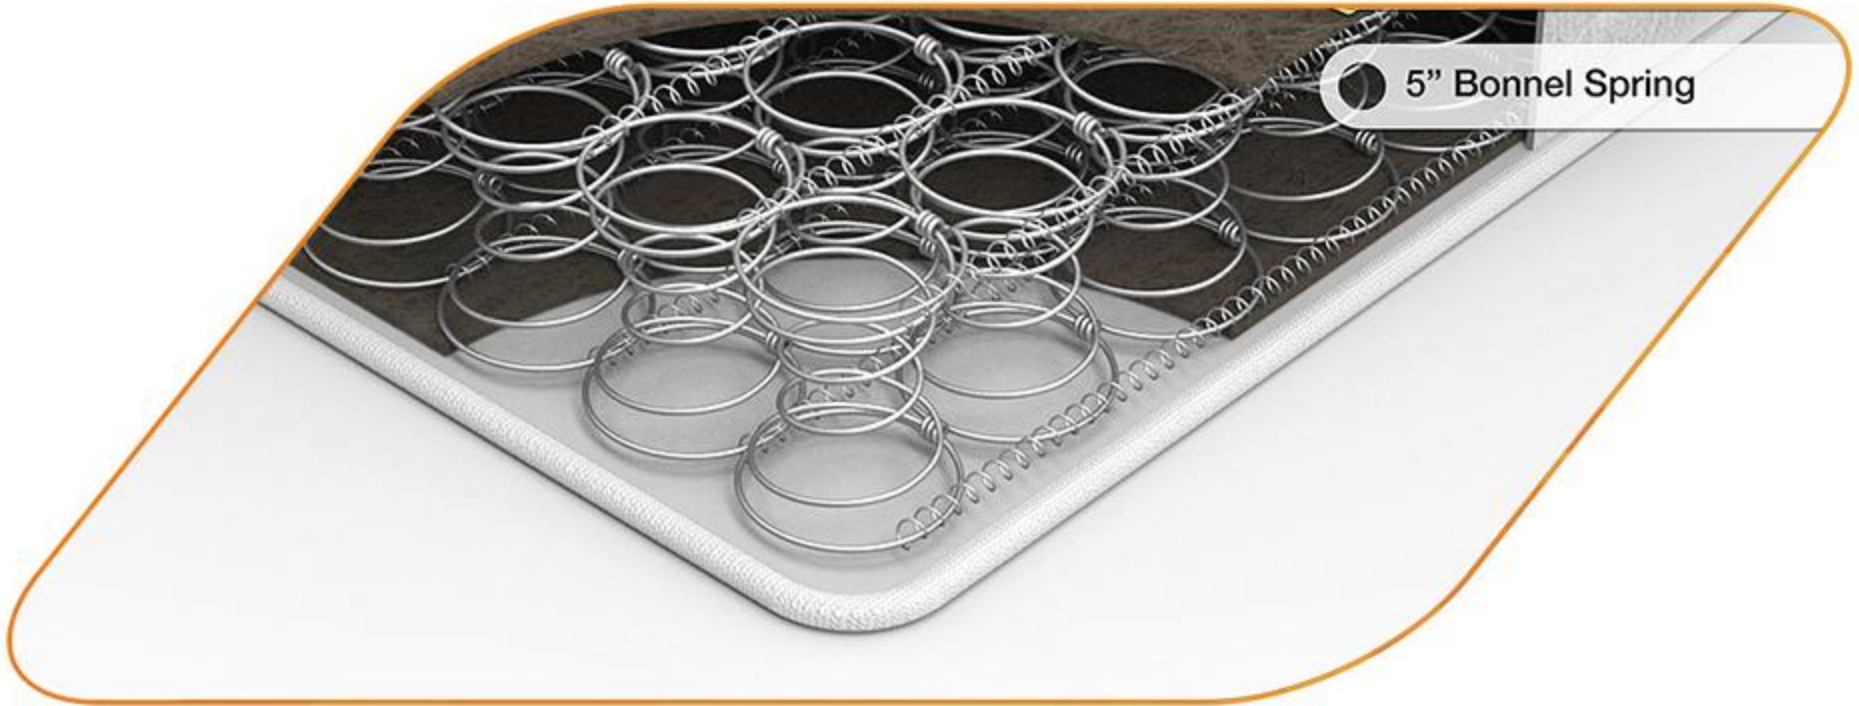

Unit:mm

- Automatic equipment for making spiral mattress springs with function of coiling.
- Adopts worm and gear decelerator and the speed can be controlled by the frequency transformer.
- Lubricating system can be controlled by computer.
- Form and knot smoothness of the spring frame is increased because of the excellent tools used on the machine.
- Be characterized with nice structure, easy adjustment, stable performance and high productivity.

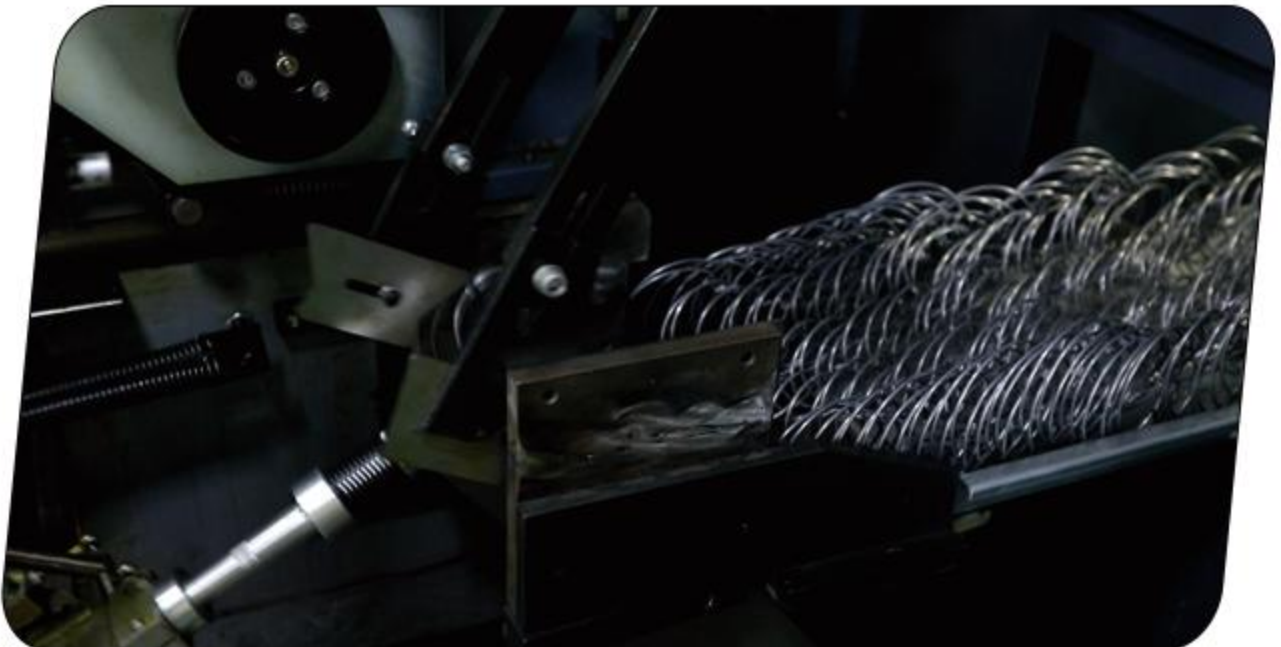

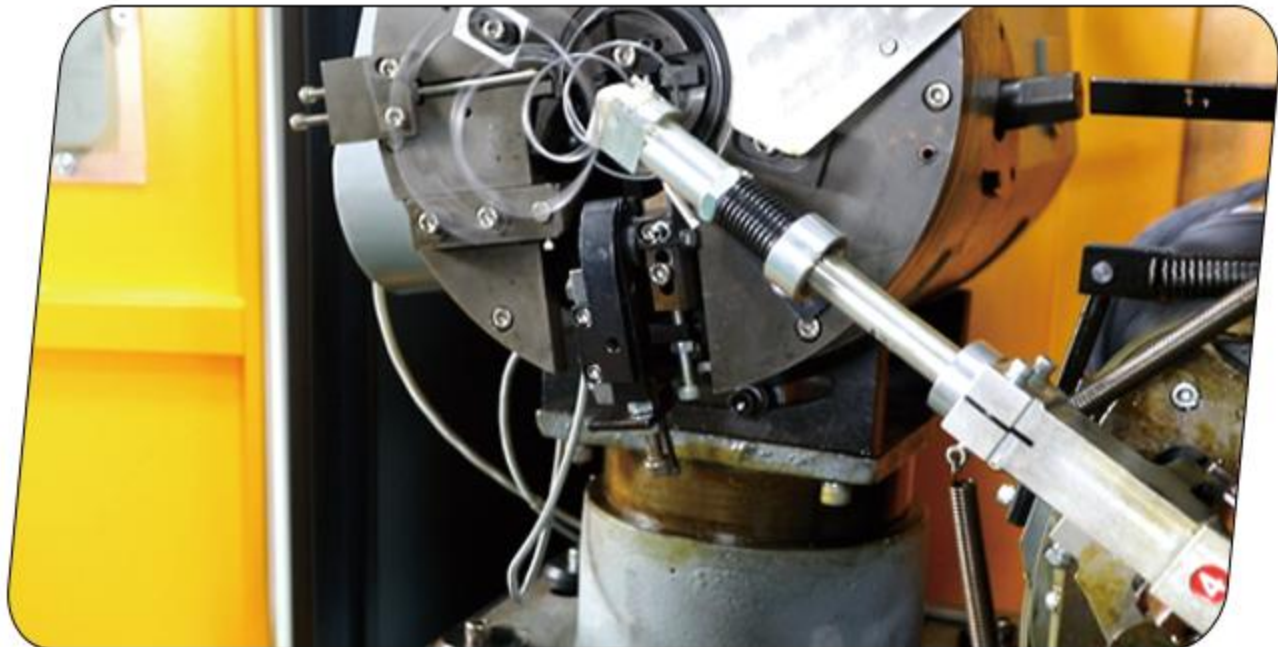

YHJ80/100
AUTOMATIC SPRING COILING MACHINE

GENMAX

Technical Parameters

Type of spring	Bonnell	Total Power	5.3Kw
YHJ80 Productivity	80-85pcs/min	Heat Treatment Power	15Kw
YHJ100 Productivity	90-95pcs/min	Wire Stand Power	2.2Kw
Diameter of Wire	2.0-2.4mm	Dimension (L x W x H)	6600 X 2200 X 2200mm
Spring Coils	4-7turns	YHJ80 Weight	2000KG
Height of Spring	120-200mm	YHJ100 Weight	2600KG
Range of Spring Diameter Mold	66-68mm,69-71mm, 72-74mm,76-78mm, 79-82mm,83-87mm, 88-92mm(customized)	Power Supply	AC380V,3P,50HZ AC220V,3P,60HZ (415V-480V customized)
